PUT A RING ON IT

Find a ring that fits how you want it to fit. Place that ring on a circle below to find its size. You can do the same with a piece of string. The inside of the ring should just barely touch the edge of the circle.

PRINT A RING SIZER

Print and cut out the DIY Ring Sizer below.
Create a slit by cutting the dotted line.
Place the sizer around your finger.
Slip the skinny end through the slit, numbers facing out.
Pull the paper very snug. It may press in on the skin but should fit over the knuckle.
Your approximate size should be the number that appears.

Tip: the line below should measure 3.5in with a ruler
